EDUCATION

University of Pennsylvania, The Wharton School
Bachelor of Science in Economics, Major: Finance

August 2024 - May 2028

- **GPA: 3.69/4.00**

EXPERIENCE

University of Sydney – Sydney, Australia
Quantitative Researcher

May 2025 – August 2025

- Built econometric and time-series models in Python and MATLAB to analyze 26+ S&P 500 companies and improve detection of speculative price bubbles.
- Analyzed historical equity price movements (1996–2023) to generate statistical signals and identify valuation anomalies and risk indicators using financial modeling and Excel.
- Conducted rolling-window backtests across multiple time horizons to evaluate model stability and sensitivity to volatility regime shifts.

PROJECTS

Algorithmic Trading System – Live P&L

January 2026 – March 2026

- Generated \$539 in realized P&L (22% return) on \$2,450 invested capital within two months, tracking performance metrics and summarizing results in Excel.
- Built a backtesting engine in Python incorporating moving-average trend and factor-based signals, calculating Sharpe ratio, max drawdown, and portfolio risk metrics to validate strategy before live execution.
- Incorporated an NLP sentiment signal via Hugging Face transformers, scoring live financial headlines to time entries and improve signal quality.

Interactive Financial Bubble Detection Dashboard

July 2025 – August 2025

- Integrated Python (NumPy, Pandas) and MATLAB statistical models to analyze time-series data, options market indicators, and volatility across rolling windows, driving quantitative insights for risk assessment.
- Deployed dashboard on Vercel with responsive design and presented findings to stakeholders using PowerPoint decks to support institutional-style risk monitoring and portfolio management.
- Developed an interactive financial risk visualization dashboard using Next.js, React.js, TypeScript, and Plotly, analyzing 26+ S&P 500 equities and indices.

LEADERSHIP

Maritime@Penn – Philadelphia, PA
Founder & President

September 2024 – Present

- Lead Penn's first maritime club, scaling membership to 100+ students and managing a social media presence of 1,000+ followers.
- Direct six specialized committees to execute projects across maritime finance, engineering, law, logistics, and innovation.
- Organize 15+ speaker events with C-suite executives, facilitating mentorship and internship opportunities for members.

TECHNICAL SKILLS

Languages: Python, MATLAB, TypeScript

DevOps & Tools: Financial Modeling, Quantitative Research, Backtesting, Factor Investing, Capital Markets Analysis, Quantitative Data Analysis, Excel, Plotly, Tableau, Hugging Face, yfinance
